Four years ago, workforce development became one of the four distinctive elements that Central adopted as part of the University’s strategic plan. Data indicated then, and more so today, a national shortage of college graduates in science, technology, engineering, and mathematics programs—the so-called STEM fields of study that have become central to the success of nearly all business enterprises.

In this issue of the Focus, three of the University’s distinguished alumni discuss the profound and urgent need for educating students in the STEM programs, beginning early in their lives and on through college. Their insights strongly suggest that our students’ success in STEM is the key to our state’s and nation’s ability to compete globally.

Workforce development is also a motivating factor in the recent redesign of Central’s Continuing Education program. As described in this issue, our revamped Continuing Education program aims to meet a broad range of business needs for organizational development as well as an equally broad range of individual needs for professional growth and cultural enrichment.

Our commitment to educating for the future and our continuing efforts to extend it to an even wider constituency of learners make it abundantly clear that Central remains, even in tough economic times, a vital resource for Connecticut.

Central Focus Summer 2012 – 1
Educating for the Future: STEM, Innovation, & the Adventure of Learning

At part of Homecoming 2011, CCSU’s Institute of Technology & Business Development hosted an Executive Seminar featuring distinguished CCSU alumni. After the seminar, they gathered to discuss the importance of science, technology, engineering, and math (STEM) for the career success of school and university students. Although it was intended to be only a brief interview session with WNPR reporter Harriet Jones, the conversation quickly became a wide-ranging round table discussion. What follows is a condensed version of that conversation.

The distinguished CCSU alumni are: Carol A. Ammon, founder and retired CEO of Endo Pharmaceuticals; Charles T. Fote, who led First Data to a $60 billion business; and Dan Siracusa, founder of the industry award-winning Siracusa Moving & Storage. They were joined by CCSU Professor of Management & Organization David Fearon.

Harriet Jones (NPR): Why are science, technology, engineering, and math important in education?

Fearon: Adventure. STEM is one of the arenas for true adventure because it’s all about creating the next thing. If we can bring that sense of adventure into the lives of school children and sustain it through college, then students will take the tough STEM courses necessary for making the US more competitive on the global stage.

Jones: So, it’s about making it relevant?

Fearon: It is relevant, but I’m not sure our young people can see it because a lot of science is done behind the walls. They see the product but maybe they don’t have enough interaction with technologists and scientists to get that sense that these people are always on the verge of a solution.

Ammon: I agree. Technology allows us to continually reinvent ourselves. From a competitive, global perspective that’s really important. But look at it just from a personal basis. Consider the ability to constantly change how we bring drugs to market; for example, using the human genome to target specific drugs for a cancer or a neurological disorder. We are on the precipice of being able to do that, and it’s a revolution. For our young students to be able to participate in that change is ever so exciting.

Fote: Think of the things we can do today that weren’t even thought of 20 years ago. There are no boundaries. With the Internet you have five billion interactors. People communicate with each other on the fly. That is changing the way people pay their bills or buy things and interact in other ways. As one little example, think about Watson, the Jeopardy computer. They are going to start using Watson to help doctors diagnose. Five billion people could be adding data to Watson. So I think there are no boundaries to what could happen.

Siracusa: Our knowledge historically has doubled every seven years. Soon it’s going to double every month. How we prepare new generations to adapt to that is where the rubber meets the road. I was reading a story about someone who was elated to have created a new product, but the moment it was created somebody invented something making that product obsolete. That’s how quick we’re changing.

Jones: What can you say about employees coming in entry level to your industries: do you see a lack of preparation or are you seeing people coming in who are qualified?

Ammon: I’ve been impressed by young people’s preparation and eagerness to use technology to move at a faster speed than we expected. Students have grown up with this technology. We’re past the time when young people in the workplace didn’t have this technology. It’s a way of life for today’s students, and they expect to be able to use it and run with it.

Fearon: On our campus we have schools of engineering and technology, business, arts and sciences, and education. Every one of those disciplines prepares people for contributing to this kind of innovation in different ways. You cannot really make drug solutions strictly by chemists and bioscientists. You have to have someone who understands human behavior. And I would say, pointing to Dan’s business, logistics is a worldwide concern now. Ideas about that might come from a history major. So let’s be more inclusive as we’re talking about STEM. Let’s try to spread that adventure and show students the connection to any subject they learn.
Ammon: I think that’s important. Technology is the underpinning of every discipline in the workplace, and there are no longer silos. The only way a workforce is going to make progress is to be able to communicate with each other and be able to be part of the solution. As you said, Dan, somebody’s going to invent something and the next person is going to be there to bypass that invention. So all of the groups have to be able to really work together, and technology is that underpinning that gets us there faster than ever before.

Siracusa: I think today’s students are coming out very educated on the process. I see the new generation as problem solvers. But I think they’ve lost human skills because they’d rather text than talk. They’re not putting themselves in those real-life situations.

Fearon: And I would interject, looking at Carol’s field for example, in a chemistry lab you have to have people with a strong sense of what’s right and wrong. So we cannot rule out many other disciplines.

Fote: I agree that technology is great. But focusing on technology distances us from learning the business operations that rely on the technology. When I started a credit card business I made every effort to understand the business and then learn how technology could help. Today I’m concerned that the new players in the business don’t understand the transactions of business. We have to have grassroots people who have business expertise based on a breadth of learning, not just focused on technology.

Fearon: I think what inspires inventors is the good that their efforts bring to society and to them. They bring in technology and science. There’s a team, but I think without the business sense we’ve talked about here, how is this going to translate into something that’s good for society as well as being profitable. In some ways technology is neutral at best and sometimes even harmful. We know all the negative things that can happen with just a computer aspect of science and engineering, so we do have to be very holistic in educating going forward. We just can’t keep replacing people with technology.

Ammon: Technology is allowing us to get to places a whole lot faster than we could have before. But the end result still has to be the ethical environment. Technology can bring us to very difficult ethical dilemmas. We have to make sure we’re doing things appropriately. Technology has to be the catalyst to get us there faster, but all of those other elements are also critical.

Jones: A lot of young people coming out of school now are very good using technology. They’re “digital natives.” Do you think they are innovators, that they can innovate new technology, or that they are just consumers?

Siracusa: They have a good chance of being innovators because they are problem solvers. They can access information very quickly and get to the root of a problem. How you apply it, that’s where the rubber meets the road. Usually if they’ve been given things too easy in life they have a tendency not to work as hard for things. So we are trying to train them a lot quicker because they are very impulsive. You have to rein in that energy level and redirect them.

Jones: Do you think there is enough awareness within the education system of what employers need? Do you think there is enough coupling between the philosophies of the education world and what businesses actually think we need in a workforce?

Fearon: I think it was easier for an employer to know what she or he needed 15 years ago. I’m guessing that employers today are not all that sure. I know what my product should be. I know my strategy, but I’m not sure I know exactly what skill sets I want. I think it’s something we discover together. I don’t think we sit here as educators waiting for employers to bring the challenge – “What do we need to do together?” What do I need to do, as an academic, with my neighbor Dan Siracusa so that when I send a student Dan’s way, Dan is able to reinvent his business with that student rather than fill a box he created years ago.

Siracusa: If I tell new employees that I’m hiring for a role, by the time they start the role it might change. So I tell them, “I’m hiring you based on your skill set, based on that toolbox that you brought, but where I find a need I might move you. You might be a third baseman today, and a first baseman tomorrow.”

Jones: So adaptability?

Siracusa: Adaptability.

Fearon: Charlie had 41,000 people working for him. Did you keep them all in silos and boxes, Charlie?

Fote: We couldn’t. They’re humans. We were well diversified because we were scattered around the world, so that made it even more difficult to keep them in silos or boxes. But interaction in a company crosses all departmental borders.

Fearon: I did a study once on “firsts.” Right up until about 1963 or ‘64 Connecticut had lots of firsts. Then it tapered off. I asked an audience, “What the heck happened after ‘62? Where are the people who can create the firsts and why not here?” One answer was, Well, they moved to California and Silicon Valley. They felt they had more interaction, more energy.

Ammon: I agree with that so heartily. We’re not working in silos anymore, so everybody can participate in reinventing the workplace. But it’s an employer’s responsibility, particularly if you want to keep businesses local, to create the environment that enables that to happen. If you create an environment where you’re really siloed it’s never going to happen and people will go elsewhere.

Fearon: We have to model that in schools, as well. We can’t keep marching kids through little silos and grades and separating them off and then expect them to explode out into an open environment where they have a place at the table. We have to change the way we organize schooling, including higher education, so students can actually be ready for that or they are going to be stunned when they get out there.

Fote: And that’s especially true when you consider the world economy. Technology is becoming available to students all over the world. So we need to make sure that in the school system the kids can not only access it but are disciplined on it. The countries with the best disciplined systems and the most school days will win the global economy. We have to find a way to keep competitive.

Ammon: It’s about our ability to transform how we do work to increase the value equation. We have to find a way to make the same product or a better product at a lower cost.

Siracusa: And that’s where technology, engineering, and math come in, because learning how to do the job in a more cost-effective way while increasing quality at the same time, that is the adventure for the US. And the only way we’re going to compete is to bring out this kind of ingenuity at a higher level and sustain it in our young people. Let’s look closely at what kind of curriculum we can design to keep us competitive anywhere in the world. I love that challenge.
Michele Dischino

Sparking Student Interest in Science, Technology, Engineering, and Math

Growing up, Associate Professor of Technology and Engineering Education Michele Dischino was mystified by her Etch-A-Sketch™. How did the drawing contraption work? What made that gray powder stick to the screen and then allow it to be shaken free of the drawing surface so that a new picture could be created? She needed to see inside.

Today, her sense of scientific curiosity firmly intact, Dischino is researching the most effective ways to capture and keep students’ interested in science, technology, engineering, and math (STEM).

“My degrees in engineering (BS, mechanical engineering, Manhattan College, and PhD, bioengineering, University of Pennsylvania) are crucial to my teaching and research,” says Dischino, who joined the School of Engineering and Technology six years ago. “But I think it’s important for every member of society to have insights into engineering. Can you imagine a world without technology?” She laughs, “Or students without cell phones? I don’t want students to think STEM subjects are boring, useless, and difficult. I want students to be captivated by an understanding of these areas and to feel they can be creative in finding solutions to society’s challenges.”

Dischino is co-principal investigator for “Problem-Based Learning for Sustainable Technologies: Increasing the STEM Pipeline,” a three-year Advanced Technological Education project, funded by the National Science Foundation, that began in 2009 and will continue until fall 2012.

Problem-based learning (PBL) is an instructional approach whereby students learn content by actively and collaboratively solving authentic, real-world problems. “Used extensively in medical education since the 1970s, PBL has emerged as an exciting and effective alternative to traditional lecture-based instruction in STEM education,” she says. “Research shows it improves student learning and retention, critical thinking and problem-solving skills, teamwork, and the ability to apply knowledge in new situations—skills deemed critical for success in the 21st-century workplace.”

The principles of PBL are being used to develop innovative, standards-based curricula with the aim of increasing students’ interest and preparedness in pursuing STEM-related careers. “The project principal investigators—myself included—worked with industry collaborators who are breaking ground in ‘green’ technologies to create a series of online multimedia PBL resources focused on sustainability,” she says. Referred to as “STEM PBL Challenges,” the instructional materials are designed to engage high school and college students in real-world problem solving.

“The materials build on our previous NSF-funded project, ‘PHOTON PBL,’ in which we developed similar materials, specifically for educators, about the field of photonics,” explains Dischino. The results were very positive. Students who used the materials showed greater motivation and self-efficacy and increases in their problem-solving abilities. “We’re optimistic that the STEM PBL Challenges will prove to be equally, if not more, effective,” she says.

Another goal of the current NSF-funded research is to introduce pre-service teacher candidates to PBL methods and conduct research to determine their attitudes regarding use of those methods in their future classrooms. Here CCSU plays a critical role due to the strength of its teacher education programs.

In spring 2011, 15 CCSU technology education students were enrolled in a required methods course, Teaching Technology and Engineering Education, that was modified to include PBL. Throughout the semester, students were presented with fundamental concepts related to PBL methodology and introduced to the STEM PBL curricular materials. They were led through the development of those materials and instructed in effective implementation, considering both student and teacher perspectives. Data from the pilot semester of the modified course, including pre- and post-surveys and focus group findings, were analyzed and presented at a conference in March 2012.

Dischino’s work has gained recognition. She was one of 59 women in Connecticut selected as finalists for the 2010 Women of Innovation Awards to honor innovators, role models, and leaders in the technology, science, and engineering fields.

Future Scholarly Projects?

But she’s not resting on any laurels. She and her associates are in the process of writing an application for another NSF grant. “We’re planning to expand the reach of our two successful PBL projects into the field of advanced manufacturing, by creating a new series of multimedia challenges,” she says, “and we aim to also increase the number of STEM teachers capable of developing and delivering PBL instruction. Our hope is that our efforts will continue to inspire students to pursue careers in STEM.”

Dischino adds, “I am particularly excited to be introducing these problem-based learning concepts and materials into our pre-service teacher education courses where they will benefit both our CCSU students and the many young individuals they will go on to teach. As one of only a handful of institutions with an undergraduate degree program in engineering education, CCSU is ideally situated to become a leader in this emerging field.”
Matthew Specter’s Book Illuminates Philosopher Jürgen Habermas

By Geri Radacsi

It takes an intrepid spirit to dare analyze the complex writings of Jürgen Habermas, the prominent German philosopher and social theorist. Matthew Specter was “thrilled” to do just that.

“I never dreamed when I was working on my dissertation at Duke University that I’d meet Habermas, interview and correspond with him personally, and that he’d read my book about him,” declares the CCSU assistant professor of history.

Not only did Habermas communicate with Specter, but he praised his first book, Habermas: An Intellectual Biography (Cambridge University Press, 2010). “You have placed my academic publications on the one hand, and my commentary on current events on the other in the contemporary historical context of the history of the Federal Republic [of Germany], and derived from it a learning-process in which I can recognize myself. That is a respectable achievement, not least because I had not expected it from a non-native.”

Specter, who joined CCSU in 2008 and whose areas of specialization are intellectual and cultural history, modern Europe, and Germany, illuminates the interrelationship between the thinker and his culture. “My book uses Habermas’s career as a window on the reorientation of West German political culture to a liberal-democratic model after 1945,” he says. “It places Habermas’s project of renovating the ideal of the rule of law at the center of his oeuvre.”

The book is an outgrowth of Specter’s 20 years as a scholar. At Brown University, after two years in Harvard’s Honors program in Social Studies, he designed his own major in Modern European Intellectual History and Social Theory and wrote a thesis on the political worldview of the Nobel Prize–winning novelist Thomas Mann.

After Brown, he deepened his language skills and went to Duke to earn his MA and PhD in European intellectual history. “Habermas was a logical choice because he provided a window on post-WWII Germany, specifically how the political Left reoriented itself after the Third Reich,” explains Specter.

What Gives This Book Originality?

It is his use of a historical “contextualization” approach that distinguishes Specter’s book from scores of others about Habermas written primarily by philosophers, sociologists, political scientists, and international scholars. As a historian, Specter fastidiously used primary and secondary sources, even comparing the academic literature with the public intellectual writing in newspapers. “It was exciting to do oral history interviews with German professors who have known Habermas and were able to corroborate my ideas,” he says.

One such idea is particularly intriguing. In the book’s closing chapter, Specter discusses Habermas’s Between Facts and Norms, published in German in 1992. An analysis of political and legal theory, it has been viewed by many as Habermas setting out on a new path, marking a legal or liberal turn in his thought. Boldly, Specter rejects this position. Rather than reading this work as the end of the Frankfurt tradition of critical theory, an embrace of liberal constitutionalism, as many have done, Specter argues that this work represents “an important restatement of the radical democratic project of reform to which Habermas has been committed since the 1960s.”

Specter says, “It was exciting to have my new theory validated in a personal interview I had with Ulrich K. Preuss,” a political scientist who co-authored the draft of the German Democratic Republic constitution. “He told me that his concern with the relationship of constitutional law to democracy had been a constant in Habermas’s life, actually an obsession.”

In a book review, Harvard University History Professor Peter E. Gordon wrote, “Specter succeeds in showing that there are no ‘breaks’ in Habermas’s preoccupation with law, constitutionalism, the future of the social welfare state, etc.” Specter, he wrote, “is a skillful historian of ideas and he uses his talents with sensitivity and precision to sound the multiple resonances in Habermas’s work.”

In July 2010, Specter commenced a second book, The Making of Transatlantic Foreign Policy Realism. During a week-long trip to Germany, he examined the unedited personal papers of Wilhelm Grewe, a former West German Ambassador to the United States, archived at the Max Planck Institute for European Legal History, in Frankfurt am Main. While continuing to use the methods of intellectual and cultural history, Specter is turning to other topics beyond the German national frame: the so-called “realist” tradition in foreign policy, and human rights in 19th- and 20th-century global history.

Specter says it took six years and “endurance” to complete his book, but he reflects, “As a descendant of German Jews, I have a connection with German history. That history is dark and cautionary, but also inspiring, because it produced critical intellectuals like Habermas—a figure who continues to give us such vital reflections on democracy and modern society.”
When César D. Delgado ’11 boarded a plane leaving Puerto Rico for Hartford in late 2004, he intended to return home satisfied, having finally seen his father after seven years. But Delgado’s round-trip ticket turned into an indefinite stay when his father, who worked at the Hartford Marriott, offered him a job, a safe place to grow, and the tools to become bilingual. “When you do something, do it from your heart,” Delgado says. This philosophy, he believes, “manifests with you being honest about what satisfies you as a person.” Delgado faced many moments in his transition from Puerto Rican to American culture that demanded nothing less than honesty and a clear heart.

Delgado worked as an overnight security guard at the Hartford Marriott, while studying English as a second language at Capitol Community College (CCC).

“It was a trying time,” he says, “because of the language barrier; it was difficult to communicate at the level I wanted.” Delgado wondered if he should go back to Puerto Rico. His mentor at CCC encouraged him to continue “doing what he was doing,” to read plenty of American newspapers, and to watch TV in English.

He learned something more from his mentor—how to accept help. He heeded his mentor’s advice and persevered.

The more comfortable Delgado became with his English skills the more he came to trust his decision to stay in the US. He was promoted to inventory associate at the Marriott, where he managed the supply chain for 140 rooms throughout the property. Delgado discovered that he liked management and started taking management courses at CCC. Delgado’s passion and hard work inspired his mentor to recommend Delgado for Travelers EDGE, a new program at Travelers that offers students part-time job experience, access to higher education, financial aid, and mentoring throughout the process.

Delgado’s part-time work at Travelers led to full-time work, and he also made the leap from CCC to CCSU as a Travelers-Central EDGE Scholar in 2010. Adjunct Lecturer of Management and Organization Kate Wall says, “César Delgado is what the EDGE program is all about. He brings curiosity, energy, and excitement to the classroom. He contributes ideas and examples from his experiences to shed light on complex theories, and, in doing so, adds value to the learning environment.”

Delgado explains that he likes to think strategically. “When I’m in the classroom, I’m always thinking beyond the classroom context. If I’m working on ‘X’ at Travelers, I ask, how does what I’m learning connect to ‘X?’ That’s what I love about class. I’m an extrovert, so I’m always talking, but, more than that, I’m participating as a professional, someone who has real-life experience.”

His experience includes not only his new role working in Bond and Financial Products at Travelers but also giving back to the community that’s nurtured him along the way. “Currently, I use my story to motivate others,” Delgado says. He mentors two students through the High School, Inc., program on Asylum Avenue in Hartford. He tells them: “Hey, I did this, so can you. Let’s break the barriers!”

Delgado has also volunteered for the United Way Day of Caring, giving one-on-one coaching sessions and mock interviews at the Hartford Job Corps Academy to students seeking feedback on their skills. Delgado’s long-term goal, in addition to becoming a leader in the insurance industry, is to found a non-profit organization to motivate students—especially those from underrepresented populations—to be successful. Delgado says, “I can’t make you be successful, but I can give you the conditions—i.e., mentoring, education, training—to excel in life.”

Delgado’s consistently positive attitude is recognized by his mentors and professors in CCSU’s School of Business. Professor of Management and Organization David Fearon reflects, “César was among the first Travelers-Central EDGE Scholars to come to us. We have closely followed his light as he moved across the semesters. Now, soon, he will carry it with him into a career at Travelers. His light comes from within. He is one passionately determined young fellow. César has lighted the path for all EDGE Scholars who follow.”

Delgado happily accepted an offer from Travelers to relocate to Florida after completing his bachelor’s degree at CCSU in December 2011. His position in Bond and Financial Products will evolve to include a Spanish-speaking customer base. Delgado feels that he’ll be in his element and a step closer to his dream of working in international business, fluidly moving between the Spanish and English languages, and modeling the philosophies that have shaped his success.
Central Focus Summer 2012 – 7

Students were on the edge of their seats for the award-winning feature films and lively debates on real-life immigration issues that highlighted the “Border Visions: Borderlands in Film and Literature” conference last fall, organizers said.

And they kept coming back to the three-day event to see films like “Sin Nombre,” in which a teen flees her native Honduras, risks her life, and witnesses her father’s murder as they try to cross illegally into the U.S.

In another film, “Illegal,” a Russian woman, who is in Belgium illegally, will do almost anything to avoid being separated from her 14-year-old son and sent to a horrible detention center.

“These were blockbuster hits with our students,” said Professor Karen Ritzenhoff, of the Department of Communication. “The films were interesting to watch—they had violence and sex and love and death and carnage, and the students loved them. They showed the drama in deportation, they put a face on what it is like to be an immigrant.”

And that was exactly what conference organizers were hoping. Because until someone has a strong connection to an issue, like immigration, he or she will never feel passionately about it, they said.

The conference, attended by 600 people, was organized by Jakub Kazecki, assistant professor of Modern Languages, Matthew Ciscel, assistant chair of the English Department, and Ritzenhoff. Some 90 international film and foreign policy experts participated.

“It was a big success,” said Kazecki. “The films we screened were selected for their impact. They were thought-provoking and addressed the uneasy topics of border relations, human trafficking, and illegal immigration.” Both the films and the panel discussions on equal rights contributed to the conference’s mission, he said.

Another highpoint of the conference was a roundtable discussion on immigration, which featured panelist Mariano Cardoso, who immigrated illegally to the US at 22 months, and grew up in New Britain. He discussed his quest to finish his college degree in Connecticut before being deported.

“It was heart-wrenching for the students at Central, who took up his cause,” Ritzenhoff said. That discussion was moderated by John Dankosky, the Robert C. Vance Endowed Chair in Journalism and Mass Communication at CCSU and news director of WNPR.

Students and lawmakers petitioned to halt Cardoso’s deportation, and he was ultimately granted a stay to complete his education.

“Border Visions” focused on the European borderlands and changes caused by the fall of the Berlin Wall beginning in 1989. But it also addressed North/South Vietnam, Korea, US/Mexican borders and more. In all these lands, borders have become places of hybridity, cultural transfer and exchange, but also of violent conflict and segregation.

Professor Laurence Raw, from the Baskent University in Ankara, Turkey, was the keynote speaker at the conference. He is a specialist in the field of adaptation and cross-cultural studies.

But border discussions didn’t stop at the conventional. The conference addressed everything from religious barriers to mental barriers; soldiers crossing the border from war to peace; science fiction borders, and potential environmental borders caused by changing topography.

Provoked by discussions and collaborations at the conference, some 10 to 12 academic papers are being written, as well as at least three potential books.
Think of a mandala, broad and circular with a vibrant center piece. The bright center radiates ring upon ring of color, texture, and design. The beauty of the mandala lies not in its parts but in how the entire work of art makes people feel connected to something central. In just 18 months, Community Central, located at 117 West Main Street in downtown New Britain, has become the core of connection among CCSU students and faculty, the Downtown District, and the New Britain School district.

Located in a 1,400 square-foot-storefront, Community Central exists to provide useable space and support for projects, programs, and small businesses aimed at connecting the CCSU and New Britain communities. “This is a permeable and passion-driven initiative,” says original founder, Associate Professor of Management and Organization Sarah Stookey. “Community Central would not have gotten off the ground if it hadn’t been for a close collaboration between CCSU, the Downtown District, and the school district,” which Stookey refers to as “three equal partners.”

The partnership makes Community Central both a destination and a launching pad for CCSU students. The initiative thrives when students like Eric Vargas, a music major interested in helping lower-income kids learn to play instruments, partners with Community Central. Community Central’s full-time director Hannah Hurwitz (in the photo above) then partners with the New Britain YMCA to arrange the six-week use of a room and a group of elementary students who are eager to play instruments. Each of these connections helps Vargas realize his dream while gaining real-world experience in the field of music education—all before he graduates.

Any CCSU student or faculty member can reach out to Hurwitz with a project, idea, or skill. She works tirelessly to provide support through networking and resources to help eager people manifest their goals in the greater community. Hurwitz, an Americorps VISTA participant, came to work for Community Central in the fall. “This is my dream job and I have it for a year,” the 29-year-old Connecticut native says. The year-long VISTA grant provides Community Central with one full-time staff person. Hurwitz is quickly learning how “vital and loyal” the downtown community is to its neighbors. Just inside the storefront, a looming wall needed to be knocked down. Soon Hurwitz found herself talking with Dura Construction’s Charlie Paonessa, a life-long resident of New Britain, who offered to demolish the wall for free and salvage the used materials for his nonprofit called The ReCONSTRUCTION Center which resells materials to the public at discounted costs.

As downtown New Britain businesses, the YMCA, and the New Britain school district come to rely on Community Central as a matchmaker, more opportunities surface for students looking to volunteer, intern, teach, and start new businesses. Stookey says, “The idea is not only to assist students in their endeavors, but encourage faculty to do more community engagement with their classes.”

In recent months, the Nursing department offered health screenings at Community Central and specially trained and certified accounting students provided free tax assistance twice-a-week through April 15. Community Central is coordinating two mural projects with CCSU art professor Jerry Butler. One will be in the pool area at the YMCA, and the other will be installed at Lewis P. Slade Middle School, where lessons learned in the classroom will inspire the design.

If you have interest in learning more about Community Central, please contact its director, Hannah Hurwitz, at centralvista@ccsu.edu.

A New Day for Continuing Education at CCSU

Interested in starting your own business? How about obtaining the Six Sigma Certification? Or improving your communications skills? Long a provider of undergraduate and graduate courses and programs that transform students’ lives and prepare them for challenging and rewarding careers, Central will soon be offering a variety of open enrollment, credit and non-credit courses of interest to all kinds of learners.

The first round of courses will begin in fall 2012. The University expects to offer an increasing number and diversity of courses responding to the needs and interests of our alumni and others throughout the state. Alumni are eligible for discount rates.

So, if you’re interested in courses for professional development, for promoting lifelong learning and cultural enrichment, for responding to workforce needs, and for promoting health and well-being, stay tuned. Better yet: let us know what kinds of courses you’re interested in. Send us an email (HuguleyH@ccsu.edu) or fill out the brief online survey at www.ccsu.edu/Con-Ed/survey.

Transformation and Realignment
The new Continuing Education program is part of a realignment bringing Continuing Education and CCSU’s Institute of Technology & Business Development together with Institutional Advancement under the leadership of Vice President Christopher Galligan. According to Galligan, the arrangement will make it possible for the University to offer a more extensive range of educational programming. The new arrangement responds to CCSU President Jack Miller’s call for a more “entrepreneurial spirit in expanding learning experiences.”

Courses for Fall 2012
The courses listed below are scheduled to run for fall 2012. For more detailed course information (including schedule and fee) and the most current listing, please see www.ccsu.edu/Con-Ed.

• Industry leader in professional development.
• Instructors are professionals with extensive learning and experience in the classroom and the workplace.
• Most courses offered evenings and Saturdays.
• Many courses are eligible for federal and other grant funding, including WIA.
• CEUs available for most courses.
• Courses can be customized for your organizational or professional needs.
FOUR CCSU ALUMNI AMONG THE

Top 40 Under 40
in Connecticut

Four CCSU alumni were recently noted for their success before the age of 40 in Connecticut Magazine’s “40 Under 40.” Roxanne (Sadowski) Melaragno ’00, MS ’05, a teacher at Middle Gate Elementary School in Newtown, is described as “one of a new generation of teachers who contribute much more to their schools than simply standing in front of a classroom,” serving as co-chair of the Early Intervention Team and as member of the strategic planning committee. Israel Caro III ’01, co-founder of the full-service woodworking company Cronus Construction, works with CIL, a nonprofit affordable housing company, to provide equal opportunity housing to low income families, and with Connecticut LAMPP to remove lead hazards from homes where children are at risk for lead poisoning. Roger Wierbicki ’98 has worked in communications with several high-profile corporations, including Polygram Label Group and Island Records. Kinga Evans ’04, who emigrated from Poland when she was 18, has had a successful career in insurance and banking industries in Connecticut. In her spare time, Evans serves on the board of Meriden’s Cove Center for Grieving Children.

Central Connecticut State University athletics is heading into an exciting new era this fall, highlighted by the completion of CCSU’s outdoor athletic complex, which will allow Blue Devil soccer to return to campus and for 5,500 fans to cheer the Blue Devils at the newly expanded Arute Field. In addition to new facilities, action on the field will be exciting as the Blue Devils pursue Northeast Conference Championships in every sport.

Football
Junior running back Chris Tolbert and senior receiver Deven Baker will lead the football team through a challenging schedule that features non-conference road games at Stony Brook and New Hampshire. The Blue Devils will open the expanded Arute Field with a non-conference game against Lehigh on September 8. The Blue Devils will also host four NEC games at home this year.

Women’s Soccer
The women’s soccer squad will be led by its defense in 2012 as junior defender Jewel Robinson and junior goalkeeper Nikola Deiter will serve as the team’s captains. Robinson was named First Team All-NEC last season and was a second team selection as a freshman. Deiter has started all but two games in her career and has posted 11 wins, including eight shutouts. The Blue Devils will play eight games on the new soccer field in 2012, including the home opener against Providence on September 2.

Men’s Soccer
Coming off a regular season tri-championship in 2011, the men’s soccer team will look to challenge for the NEC regular season title again in 2012. All-NEC selections Reece Wilson, Tom Obasi, and Mamoudou Dioumbate return for their senior seasons, as does senior goalkeeper Anthony Occhialini who posted 10 wins and six shutouts last season. The team will host Yale on August 31, in the first game on the new soccer field.

Women’s X-Country
The women’s cross country team will look to continue its rise in the NEC standings at the 2012 NEC Cross Country Championships. Despite losing 2011 Individual Champion Alasia Griebel, the Blue Devils still have the duo of junior Elizabeth Eberhardt, and Kristina Dearborn who both have an All-NEC selection on their resume. This year’s championship meet will be held at Bryant University, and the Blue Devils will get a look at the course during the season opening meet hosted by the Bulldogs.

Men’s X-Country
The men’s cross country team enters 2012 with three consecutive NEC titles and two straight individual champions. Senior Craig Hunt, who finished third in 2010 and second in 2011, will lead a talented squad into the 2012 season. Sophomore Andy Pullaro who finished 19th at last year’s NEC meet, will look to continue his rise after competing at the USA Track and Field Junior Nationals this summer. The Blue Devils will host a pair of meets at Stanley Quarter Park leading up to the NEC Championships at Bryant.

Volleyball
The volleyball team will look to continue its streak of NEC Tournament appearances in 2012. Led by senior Emily Cochran, a Second Team All-NEC and All-Tournament selection in 2011, the Blue Devils will open the season at the West Virginia Invitational before hosting the CCSU Invitational on August 31 and September 1. In addition to a strong core of seniors, the Blue Devils will also feature six new student-athletes this fall.

Swimming & Diving
Later in the fall, the swimming and diving program will return to the pool with a pair of home events. Senior Taylor Friedmann and junior Helene Neuhaus will lead a squad that has placed third or better in the NEC each of the last 14 years.

For the most up-to-date information and schedules on all 18 Central Connecticut sports check CCSUBlueDevils.com.
The University offers a wide range of opportunities for alumni and friends to support educational programs they are passionate about. Below are a few to consider. Gifts to these funds may be made online at www.ccsu.edu/giving. If a fund you are interested in supporting is not listed, you may simply type it in, in the “Other” category and be confident that your contribution will support the fund you have indicated. For more information: alumnidept@ccsu.edu or 860-832-1740.

**Institutional Support**

**Friends of the Library**
The Friends of the Library Fund provides support for the Elihu Burritt Library in order to enhance teaching and research and meet the diverse educational needs of the CCSU community. The Fund provides program and acquisition support to augment institutional monies appropriated for a quality public university library.

**Welte Society**
The Welte Society provides funds for special cultural programs to enrich and broaden the lives of Central’s student, faculty, and neighbors.

**International Education**

**James-Hauser International Exchange Fund**
Originally established to support faculty, administrative, and student exchange opportunities with institutions in East Asia, South America, and the Caribbean, the James-Hauser Fund has recently been expanded to support the strategic goals of the George R. Muirhead Center for International Education and supports exchange opportunities throughout all of Asia, Africa, Latin America, and the Middle East.

**Scholarships**

**CCSU Alumni Association Scholarship**
The CCSU Alumni Association Scholarship Fund provides scholarships for undergraduate (junior or senior level) students who are children or grandchildren of alumni and 1) completed at least two semesters at CCSU; 2) enrolled for 9 credits or more during the term when the scholarship is applied; 3) minimum GPA of 3.0; 4) evidence of service, leadership, and academic achievement; and 5) documented efforts to finance educational costs.

**Educational Support Services Scholarship**
This fund support for students enrolled in any University program aimed at providing access and opportunity to economically disadvantaged or educationally underprivileged students (e.g. Educational Opportunity Program, Connecticut Collegiate Awareness and Preparation Program).

**Foundation Scholars**
The Foundation Scholars Fund provides scholarship support for high-achieving, incoming first-year students who rank in the top 25% of their graduating class and have achieved a minimum of 1100 on the SAT.

**Graduate Student Association Scholarship**
Provides support for matriculated graduate students who have completed a minimum of 15 academic credits in residence at Central Connecticut State University, have earned a minimum cumulative grade point average of 3.50 or higher and have demonstrated exemplary involvement and leadership in student or community service activities.

**Veterans Scholarship**
Awarded to the undergraduate student(s) named as the Student Veteran of the Year at the annual Veterans Recognition Program, or similar program, regardless of the expected graduation date of the recipient(s). To be eligible for the Student Veteran of the Year award, a student must 1) be in good academic standing; i.e., minimum of 2.5 GPA; 2) have junior or senior class status; i.e., minimum of 53 credits; 3) show evidence of exemplary service to the University, the community and/or the country; and 4) have served active US Military duty for a minimum of 90 days other than training.

**Athletics**

**Frank Marietta Athletic Scholarship Fund**
The Frank Marietta Athletic Scholarship Fund provides much needed support for grants-in-aid to CCSU student athletes.

**Athletic Development Fund**
The Athletic Development Fund provides support for the intercollegiate athletic program at CCSU.

If you would prefer, you can also enable the University to allocate your gift to where it is needed most by indicating **Area of Greatest Need**.
Sharon M Gagne '94
The Ultimate Pilgrimage for Catholic Youth
Sunshine, 2011
Gagne’s book is a day-to-day guide and resource for young people and youth ministers attending The Ultimate Pilgrimage For Catholic Youth and World Youth Day.

Edward W. Larkin, Jr. '68
Learning to Fish While Learning to Live...What a Way to Grow Up
Lulu.com.
A memoir about the pursuit and enjoyment of fishing over a lifetime.

Georgian Lussier '73
55+ Unite!: Welcome All Wise Working Women
CreateSpace 2011
Lussier’s inspirational book, targeting senior women seeking employment, addresses employment issues from the interface between the recent recession and the decades-long rise of women in the workplace.

Donna Marie (Mulcahy/Pitino) Merritt '88
Cancer: A Caregiver’s View
Avalon Press, 2011
In her seventeenth book, Donna Marie Merritt continues her Poetry for Tough Times series. After coming to terms with her unemployment, she is faced with the new challenge of her husband’s cancer diagnosis. To cope, she again turns to poetry and hopes that this book will provide support and encouragement to others.

Murdo Morrison '76
Roses of Winter
CreateSpace, 2011 and A Hole Without Sides CreateSpace, 2011
Roses of Winter, a thoroughly researched novel set in Glasgow, Scotland during World War II, explores the impact of war on two families focusing especially on four strong and resourceful women. A Hole Without Sides is a memoir of Morrison’s experiences when, as a young man, he volunteered with the British service organization Community Service Volunteers.

Jim Naughton ’71
Jump In and Start Swimming: A Story of the Unique, Lucrative Career and Life of a Billion Dollar Wholesaler,
Key Publishing Company, 2012
Naughton, founder of the JP Naughton Sales Performance Company, a sales consulting and training company, began his sales career in the insurance industry in 1970 and became a sales leader of financial products for various Wall Street firms. His story of his career is both compelling and packed with practical experience and ideas.

Richard Sherman ’69
Mr. Modem’s Top 50 Kindle Tips
Kindle eBook, 2011
Richard A. Sherman, known as “Mr. Modem (www.MrModem.com),” is a nationally syndicated writer whose column, Ask Mr. Modem, appears in more than 300 periodicals nationally and in Canada. In this multi-volume ebook, he shares 50 of his all-time favorite computing tips.

Richard White ’57
These Stones Bear Witness
AuthorHouse, 2010
White is the author of four published novels. In this, his first foray into non-fiction, he presents evidence of a pre-Columbian voyage to New England, led by Henry Sinclair, Baron of Rosslyn and Earl of Orkney.
Two Ways to Better Health:

SAINT FRANCIS
Hospital and Medical Center

ADVANCED TECHNOLOGY. ACCOMPLISHED PHYSICIANS. AMAZING RESULTS.
Homecoming 2011 provided a great time for reuniting with friends and families. Mark your calendar for Homecoming 2012: October 13.
The fourth annual Construction Management Awards presented Karen Arborio ’89, coordinator of University Construction and Facilities at Southern Connecticut State University, with the Dr. Stuart Bennett Alumni award. The CCSU Construction Industry award was given to Bruce Bockstael, chief architect for the State of Connecticut.

The inaugural Women of Influence Gala at CCSU honored seven outstanding women for the impact they have had on the University, the community, and women’s lives in general. Those honored were: Carol A. Ammon ’73, founder and retired chief executive officer and chairman of Endo Pharmaceuticals (not pictured). Dr. Joanne DiPlacido, associate professor of psychology at CCSU, a strong advocate and mentor for students both in and out of the classroom. Debra Goss, manager of the External Civil Rights programs for the State of Connecticut Department of Transportation. Marlene M. Ibsen, chief executive officer and president of Travelers Foundation and vice president, Community Relations, for The Travelers Companies, Inc. Linda Sagnelli, for 12 seasons the head coach of CCSU’s Division I women’s volleyball team. The Honorable Judge Carmen Elisa Espinosa ’71 the first Hispanic appointed appellate court judge in Connecticut. And Merle W. Harris, former president of Charter Oak State College and former interim president of Central.
President’s Citation Winners

The President’s Citation Awards, honoring students who demonstrate outstanding leadership and community engagement, were presented in May. The recipients are: Curtis Porter III, communication major; business minor, Ashley Santana, English major; psychology minor, Sherreida Reid, psychology major; biology minor, Brittany Mahoney, elementary education major; English minor and (not in photo) Kaylah Smith, anthropology and Spanish major. President Miller and Vice President of Student Affairs Laura Tordenti presented the awards.

Nurses Pinning Ceremony

The CCSU Department of Nursing welcomed students, faculty, family, and friends to its Class of 2012 Pinning Ceremony, a source of pride and tradition as a new nurse begins his or her career. This was the first BSN class to graduate from the University, with 46 students earning their degrees. Another 16 students received their RN-to-BSN degrees. The pins were presented by Linda Wagner, chairperson of the nursing department and professor of nursing, and Shelley Bochain, associate professor of nursing. The keynote speaker was Maria Tackett, nurse director of neurotrauma services at Hartford Hospital.

ConnSCU Business Plan Competition

In April, students from CCSU and SCSU participated in the ConnSCU (Connecticut State Colleges & Universities) Business Plan Competition in front of over 50 attendees and judges. CCSU undergrad Judy Cossette (in photos at left) won the grand prize of $11,000 and one year in the CCSU ITBD Incubator for “Kanai Taste Flavorings,” a company that would produce healthy, liquid flavor packets for ice chips to be given to patients after undergoing medical services. Central’s Chris Meller won the Technology Business Plan Prize of $1,500 for his proposal for “Eldercare Compare,” a company that would use methodology to compare and hire eldercare. The competition is the culmination of a series organized by Drew Harris, CCSU professor of management & organization (at right in far left photo).
Four CCSU students received the 2012 Henry Barnard Distinguished Student Award for scholarship and community service.

At 16, **Enisa Alanaj** left her family in Albania to move to the US. She graduated with a degree in mechanical engineering with a 3.82 GPA and plans to attend grad school. While at CCSU, Alanaj, of Bristol, was a leader in the Albanian Association Club and worked to get middle school girls interested in math and science.

**Jeremy Bradford**, of Vernon, earned a 3.95 GPA with a double major in physics and math while balancing family life and work as a Yale astronomy department researcher. He also facilitated a tutoring program with New Britain High and served as president of the Physics and Earth Sciences Club. He plans to attend Yale’s doctoral program and become a physicist.

**Nicole Cloutier**, of Bristol, earned a bachelor of science in elementary education with a concentration in math and is an honors student. Since the fall of 2009, she has spent part of every semester in a public school classroom. She belonged to many clubs on campus, including the Education Club, where she coordinated events at New Britain elementary schools to promote college awareness.

**Kaylab Smith** of Bristol worked two part-time jobs while attending CCSU full-time and maintained a 4.0 GPA with a double major in Anthropology and Spanish. She is a member of the prestigious University Singers, for whom she helped plan a tour of Spain, and she also performs with the a capella group TGFI.

The 19-member University Singers chorus traveled to Spain, where they performed at universities and in churches and cathedrals. Among their work was music composed by Spaniard Tomas Victoria, 450 years ago. “When we finished singing Victoria’s compositions in the cathedral, students were actually weeping,” recalled Director and Professor of Music Pamela Perry. The spring concerts drew such appreciative fans, that some followed them from one performance to another.

Embrace the Power of Difference.

At Travelers, diversity is not just good business, it’s a business imperative. We recognize that diversity, and the ideas it brings, is essential for our company’s success. That’s why we seek out employees with different backgrounds, ethnicities, values and ways of thinking in order to create an inclusive work environment where they feel supported and engaged.

Find out more at travelers.com/Diversity.
Ted Orzech, who retired from teaching technical education, primarily drafting, in 1991, has now retired from coaching multiple sports at Farmington High School after 53 years of service. Orzech coached cross country and track and assisted with football, and he guided Farmington boys on the golf course for 23 seasons, winning 819 matches.

Richard White, former journalist, veteran teacher, and author of four published novels, has published his first non-fiction title, These Stones Bear Witness, a historical work. White is a writer-in-residence and a member of the English faculty at the Williams School in New London, CT.

Connecticut Governor Dannel P. Malloy has appointed Merle W. Harris to the Connecticut Board of Regents for Higher Education. Harris has 45 years of educational experience, serving in several positions at institutions of higher education—including president of Charter Oak State College and interim president of Central Connecticut State University—high schools, grade schools and the State Department of Education. Joseph Macaluso, founder and CEO of The Macaluso Group LLC in Fairfield, NJ, a company providing marketing concepts for the pharmaceutical industry, is the recipient of the Italian Tribune Man of the Year Achievement Award, sponsored by The Italian Tribune, a newspaper for the Italian American community in the tri-state area of New York, New Jersey and Pennsylvania. The award was presented at its annual Columbus Day celebration on October 7, 2011 to honor those of Italian American heritage who have accomplished something of pride for the community over a long period of time, emulating the explorations of Columbus, taking a path not yet traveled and changing lives because of their efforts. Macaluso was selected for his four decades of bringing innovative cost-savings programs to Americans needing prescription drugs. Most recently Macaluso introduced the now standard copay-reduction programs prevalent for most expensive brand medications.

Five years into his retirement as athletic director and dean of students at Nashoba Regional in Bolton, MA, Peter Richards has been tapped to be interim athletic director for a year at Westwood High School in Westwood, MA, while a search is conducted for the position.

Mary Loftus Levine, who started her education career as an elementary school teacher and special education counselor in West Springfield, MA, and is recognized as a seasoned and committed teacher advocate, has been appointed executive director of the Connecticut Education Association (CEA). The first female executive director in the organization’s almost 160-year history, Levine joined CEA in 1986 as an organizer and labor negotiator.

Anne E. Morris, executive director of the Connecticut Affiliate of Susan G. Komen for the Cure, was elected to the board of directors of the Connecticut Cancer Partnership.

After retiring from 32 years as a history teacher in the Dallas Independent School District,
Sue (Jones) Blanchette is currently serving as president of the National Council for Social Studies (NCSS) in Silver Spring, MD. Blanchette’s term began July 1, 2011. John Nowobilski, PGA professional at Tallwood Country Club in Hebron, CT, was selected by Golf Digest as the #1 male golf instructor in Connecticut.

Denis Medeiros, head of the Department of Human Nutrition and associate dean for scholarship and research in the College of Human Ecology at Kansas State University (KSU), was appointed dean of the School of Graduate Studies and vice provost for faculty at the University of Missouri–Kansas City. Prior to KSU Medeiros was at Ohio State University for 11 years, serving as associate dean for research and graduate studies for four years, and at the University of Wyoming.

In his memoir, Escaping Quicksand, David Horan writes about how to live life fully while dealing with multiple sclerosis, the effects of which forced his retirement from a 30-year career in sales. His current promotion of the book also serves to promote the efforts of the Connecticut chapter of the National Multiple Sclerosis Society. John Kukulka has joined Peoples’ Self-Help Housing in Santa Barbara, CA as rental development department manager responsible for oversight of the development of Peoples’ affordable rental property construction in San Luis Obispo, Santa Barbara and Ventura counties.

David Szewczul, from Tunxis Plantation Golf Course in Farmington, won the 66th Connecticut Senior Amateur Championship in September, one week after successfully defending his New England Senior Amateur title, and wrapped up the CSGA Senior Player of the Year title. The Mesquite Arts Center in Mesquite, TX hosted an exhibition of recent work by local artist Diane Walker-Gladney. The work is a collection of mixed media paintings, reflecting the artist’s interest in ordinary moments and conversations that may seem insignificant.

William J. Pomfret joined Professional Underwriting Associates LLC in Wethersfield as vice president of underwriting. Pomfret previously worked at Discovery Re as a property practice leader.

After nearly 33 years of service Keith T. Hall recently retired as a transportation supervising planner in the Office of Environmental Planning in the Connecticut Department of Transportation. Hall is now a second lieutenant in the United States Air Force Auxiliary (Civil Air Patrol – 186th Composite Squadron). He has been appointed assistant operations officer for the Connecticut wing. Hall is a licensed pilot and is now training to become a mission pilot, conducting search and rescue operations and other sorties as needed. Athletic trainer Anthony Ortolano [MS] was inducted into the Rome (New York) Sports Hall of Fame in honor of his accomplishments from his multi-sport playing days in high school and college, as well as his success in training. Ortolano has been the head athletic trainer at Rensselaer Polytechnic Institute in Troy, NY since 1985.

Musician James M. Clark, a founding member of Connecticut Valley Field Music, a fife and drum band based in Middletown, has published a book, Connecticut’s Fife & Drum, believed to be the first full account of the state’s fife and drum tradition.

Certified public account Patricia J. Foley was inducted into the Housatonic Community College Foundation’s Alumni Hall of Fame in November. She has been self-employed since 1998.

Stephen Vavrek was reelected to a second term as first selectman in Monroe. Previously he has served on the town council, board of finance and parks and recreation commission.

Jonathan M. King, a realtor who covers Canterbury and several other eastern Connecticut towns, has joined the sales team at Storrs-based Weichert, Realtors – Four Corners Real Estate LLC.

Veteran account executive Jay J. Rasmus has joined Mahoney Sabol & Co. LLP as partner at the Glastonbury accounting and tax and business services company located in Aurora, CO. Frank E. Rudewicz, a partner in the accounting and advisory company Marcum LLP who has conducted numerous investigations of government, corporate and private misdeeds around the country, most recently completed an investigation of conditions at the Hartford Police Department, where he began his police career. William J. Shea II is a partner at Kerr Agency, Inc. in Simsbury, working in bonds and insurance.

Michael Foran, principal of New Britain High School, was named the 2012 MetLife/NASSP National High School Principal of the Year. Foran, previously assistant principal, became principal of the high school, which has 2700 students, in 2006. Lisa (O’Brien) Hurley has joined the Ameriprise Financial office of Loomer & Associates in East Hartford as a financial advisor.

Veronica M. LeDuc [MS] has joined New Canaan High School as assistant principal. In addition to almost 20 years of experience teaching science and math, LeDuc has served for 13 years in administrative positions, including assistant principal, at Torrington and Thomaston High Schools, and principal at Torrington High School.
School. Most recently she taught physics and chemistry for the past three years at Brookfield High School. Manchester Superintendent Kathleen Oullette [MS] was chosen as the new superintendent of Waterbury public schools.

88 Amanda H. Astarita is the new social services coordinator for the Town of Durham. Astarita was previously a preschool and elementary teacher, and worked with community services for North Haven.

89 Veteran basketball coach Shay Berry has been hired as the head men’s coach at Hunter College in New York City. Berry joins the Hawks after a five-year stop at Division I Ivy League member Dartmouth College in Hanover, NH. Montville Public Schools welcomed Amy McCarty Espinoza as the new principal of Dr. Charles E. Murphy School. An elementary school teacher in Norwich public schools since 1992, Espinoza became a literacy coach in 2002 and was, most recently, assistant principal at Weequonnoc Elementary School. Kevin Giancola, head men’s golf coach at Central and head pro at the Golf Quest Family Sports Center in Southington, won the 80th Connecticut Section PGA Championship at Black Hall Club in September, his fourth section title. Thomas C. Hutton has joined the management team as CEO of PAS Technologies Inc., an aerospace maintenance, repair and overhaul company in North Kansas City, MO. Hutton has over 25 years of experience in the aerospace industry, serving most recently as vice president of Pratt & Whitney’s global service partners, maintenance, repair and overhaul portfolio for the last year.

90 Veteran soccer coach, and co-founder of the Connecticut Football Club (CFC), Steve Coxon’s latest endeavor is CFC AZUL, the newest addition to the United Soccer League’s Premier Development League for 2012, and the sole franchise in Connecticut. Coxon will serve as president. Robert W. Nadolsky is night operations shipping manager at HPC Foodservice in South Windsor.

91 MaryEllen Fillo has been a reporter with the Hartford Courant since 1971. Known for her daily Java column, Fillo also can be found at courant.com/javablog. Additionally, she is a guest commentator daily on WDRG-FM and AM and appears on the Fox CT morning news show on Thursdays. Jacqueline B. Lema is director and head teacher of the newly-opened Redwing Pond House Preschool, a nature-based pre-school on the grounds of the Ansonia Nature Center.

92 Cheryl (House) Geidel has joined the underwriting team of XL Insurance America, Inc. as vice president, equipment breakdown, and will be based in North Carolina. Geidel’s 20-year insurance career includes time with Zurich North America, most recently as vice president, technical underwriting for boiler and machinery. Christian D. Griffin is a vice president and wealth manager for J. P. Morgan Chase in Greenwich and New York City, and previously worked at Bernstein Global Wealth Management. Canton Intermediate School art teacher Deborah Lang-Beaudoin is Canton’s 2011 Teacher of the Year. Lang-Beaudoin has taught Canton fourth-, fifth-, and sixth-graders since 2001. She previously taught in Southbury for nine years. Torrington High School social studies teacher Patrick J. Richardson was named as the district’s 2011-12 Teacher of the Year. Credited with leading a classroom where participation and collaboration are encouraged and students are given a voice, Richardson has taught for six years in local schools, and previously worked at Touchstone School in Litchfield and the Northwestern Connecticut Adult Education Consortium.

93 Local expressionist and scenic artist Andria Alex was chosen by Hartford’s TheaterWorks to design a major installation of Hartford-themed art to encompass the exteriors of 101 and 111 Pearl Street, vacant properties in Hartford’s downtown district. This project was a collaborative effort between Alex and several Hartford organizations, led by TheaterWorks, in an ongoing effort to improve and promote the Pearl Street District. Gregg M. Angelillo, regional director at Delaware Investments, a member of Macquarie Group, was elected to the executive committee of the Metropolitan Golf Association (MGA) in Elmsford, NY in 2010, one of the nation’s oldest and largest regional golf associations. In 2010, Angelillo was elected as president of the New Jersey Golf Foundation, founded in 2004 as the official charity of The New Jersey Section PGA.

94 Newark, NJ Fire Department Capt. Mike Gibbons dominated his 76-kilogram master-free wrestling weight class and earned a gold medal at the World Police and Fire Games last summer in New York. A former all-American grappler at Central, the 18-year member of Brick City’s Bravest pinned rivals from the Russian State Fire Service and the Punjab Police of India before outpointing his finals opponent from the New York Police Department. Pamela Koncki teaches English at the South Carolina Governor’s School for the Arts and Humanities, a Greenville, SC, residential public high school for emerging artists. Koncki resides in Greer, SC, with her husband, James Koncki 1998, a chemical specialist with JTEKT Koyo Bearings in Greenville. Eric Lachniet was promoted to manager in the audit department at J. H. Cohn LLP in Glastonbury. Janet Reesor Leita is the owner of Dirty Dog Do It Yourself Pet Wash and Pawtry Shop in Berlin, CT, a career change after working for 10 years as a residential manager for a supported living program for adults with developmental disabili- ties. Steve Supernaug is a member of the financial institutions group at Whittlesley & Hadley, PC in Hartford.

95 Dave Adam resigned as varsity baseball coach at Newmarket High School in Newmarket, NH, where he had coached since 2003, to devote more time to his family and Strike Three Baseball, his baseball training business. Adam brings to his training facility – where he teaches primarily pitching – not only his high school and CCSU playing experience, but also his professional baseball experience with the Seattle Mariners and the Tampa Bay Devil Rays. Lisa (Cantara) Geiger is assistant athletic trainer at The College of St. Rose in Albany, NY. Geiger is a certified athletic trainer, a certified strength and conditioning specialist, and an approved clinical instructor with 16 years of collegiate experience, mostly at Stony Brook University where she became head athletic trainer. Jason Newman, a partner at Kostin, Ruffkess & Company, LLC, was honored with a 2011 “40 Under 40” award. Presented by The Hartford Business Journal, the award recognizes the region’s best and brightest young professionals on track to play leadership roles throughout central Connecticut. One of the youngest individuals to have been appointed a Kostin
partner, Newman has since become leader of the firm’s employee benefit plans audit group.

96

The Master’s School in West Simsbury welcomed Christina P. Beebe [MS] to the faculty as middle school art teacher. Beebe has with a background in public speaking, tutoring, and landscape design, and previously taught in the Farmington and Plainville Public Schools for seven years. Norman Hausmann ’54 left campus 58 years ago, but it is still a place where he relishes spending time.

“I just fell in love with the college,” Hausmann says.

And in many ways, it changed his life. Growing up, “I didn’t think I had much potential in life,” he says. “But somehow that potential got awakened here.”

Hausmann went on to a successful career, retiring from Connecticut Mutual after almost 50 years.

“None of that would have happened if I hadn’t come here,” Hausmann said.

After he retired, Hausmann and his classmates created a Class of 1954 Scholarship Fund, and received many generous donations. So far, the program has aided 10 students in their dreams of becoming educators.

“I think Central provides a wonderful opportunity for young people to get a start,” Hausmann notes. “We’ve helped some really good kids.”

One of the important ways that Hausmann remains a part of his University is through CCSU’s planned giving program. He has provided a bequest to further benefit the scholarship fund.

“I don’t know why every class doesn’t create a scholarship for the University,” he says. “It is really important to say, ‘This is the Class of 1954. We were here, and here’s something we did to give back.’ It gives you a terrific sense of satisfaction.”

Find out how you can make a lasting impact on Central students while providing tax and other benefits to you and your family: www.ccsu.edu/plannedgiving. Or call 860-832-1765 or email GalliganC@CCSU.edu

“I think Central provides a wonderful opportunity for young people to get a start.”
In November CCSU hosted the Latinos in Higher Education Conference, a forum on such critical issues as the existing under-representation and not yet fully realized success of Latinos in higher education. Hunter College’s Dr. Tony De Jesus delivered the keynote address, “Tinkering Toward Latinotopia.” Other presenters included Dr. Tim Black, director of the Center for Social Research at the University of Hartford; Dr. Elsa Núñez, president of Eastern Connecticut State University; Dr. Wilfredo Nieves, president of Capital Community College; Dr. Estela López, senior program associate of Excelencia in Education; and Dr. Peter Rosa ’68, MS ’72, senior program officer of the Hartford Foundation for Public Giving. Event sponsors included Latin American Studies Program, Office of Diversity and Equity, Counseling and Wellness Center, Student Affairs, and the departments of anthropology, English, and sociology.
