Accessing Banner INB, Hyperion, or WebNow from Wireless on Campus

Procedures

The preferred method to access the Secure Enclave (for access to Banner INB, Hyperion, or WebNow) is via the wired network on-campus. Should you find need to access the Secure Enclave while on the CCSU-BLUENET wireless network, you will first need to log in to the Remote Application Server (Citrix).

Windows or Mac Laptops

1. Connect to the CCSU-BLUENET wireless network.

2. Open a web browser and navigate to the Remote Application Server (Citrix) at [https://apps.ccsu.edu](https://apps.ccsu.edu). Log in with your BlueNet username and password.

3. Click on the Desktop icon from the main screen.

4. A separate Citrix Desktop will open. Open Internet Explorer from the Citrix Desktop, and navigate to [https://secureapps.ccsu.edu](https://secureapps.ccsu.edu). Log in with your BlueNet username and password, and follow the prompts to authenticate via Duo Security.

5. Once logged in, click on the Secure Apps Desktop.

6. Open Banner INB, Hyperion, or WebNow using the icon on the Secure Apps Desktop.
