REQUEST FOR QUOTATION 2016-34
Copernicus Garage Cameras
Addendum #1 Dated June 1, 2016

Addendum 1 has been issued to answer questions submitted.

1) On cameras #1, #6, #7* there is a gate opening in the fence. If the camera were to be moved here and put on a swing in mount would help in servicing. The opening must be for snow removal so it would need to be mounted to still allow for that. Is this something CCSU would like to consider?
   ANSWER: The camera is mounted above door. There is no need for swing arm. See other garage entrance exit mountings for further details.

2) Can Camera #2 be mounted on Stair #2 structure?
   ANSWER: No it cannot.

3) Camera #3 is going to be blocked by the chiller cooling tower structure. Do you want to relocate it to Stair #3 of the back of stair #4?
   ANSWER: Redirect camera #3 to face east.

4) On camera #5 and #8 it was mentioned CCSU would provide a pole to mount the cameras on. Will CCSU be supplying the pole for the cameras?
   ANSWER: Yes CCSU will be providing the pole.

5) On camera #10, it is very high you may want to consider a opening in the fence such at the gate in question #1 and mount the camera on a swing arm to move in for servicing. Would CCSU like us to include the swing arm?
   ANSWER: No

* See attached drawing for locations of referenced camera numbers.

All other terms, conditions and specifications in the RFP remain the same.
