1) University surveys to date have not had a sufficient response from part-time students to validate their concerns. However, a comparison of results of transfer student, residential student and commuter student responses were compared with the limited number of part-time student responses. The results indicated that the number one most dissatisfaction is caused by “the run-around”. The second was the amount of courses offered within their programs. The third was parking.

2) Initiate a chapter of Alpha Sigma Lamda, an honor society for non-traditional college students during the Spring 2008 semester. Research the number of degree programs that may actually be completed on a part-time basis in the evening or on Saturdays. Advocate for a Bachelor of General Studies or Liberal Studies to expedite degree completion. P.S. Charter Oak is eating our lunch. This would be an advantage for adult students part-time and full-time. Increase the availability of resources after 5 p.m. i.e., bursar, advising, admissions, financial aid. Increase the availability of online CCSU courses during the fall and spring semesters. Encourage extension of operating hours of the library and computer center during the summer and winter sessions. Currently there are no weekend hours of operation.
