

**Examination of Time To Degree Completion:  
Bachelor's Degree Recipients 2004-05, 2005-06, 2006-07, 2007-08 and 2008-09**

*November 6, 2009*

**Overview**

This study examines how long it takes students to earn bachelor's degrees at Central Connecticut State University (CCSU) from the semester of entry as well as how many credits they have earned in pursuit of the degree. Overall results indicate that for graduates from the past five years more than four out of five students earned their bachelor's degree in six years or less following their first semester at CCSU. Over half completed between 120 and 130 credits when finishing their degree.

The study grouped graduates into entering and graduating years by fiscal year (Summer, Fall, Spring). Students were also categorized as full-time or part-time enrollment status in their first term at CCSU. It is important to recognize, however, that student enrollment patterns are complex, and include changes between full-time and part-time status, summer enrollments, concurrent enrollments at other universities, and semesters when they are not enrolled at all. This study does not account for this complex credit-taking pattern. This study does not break out students who started their college careers at CCSU or students who transferred to the university

**Time to Degree**

- Among bachelor's degree recipients from 2004-05 through 2008-09, more than four out of five (80-84%) earned their degrees in six years or less. About seven out of ten (68-75%) earned their degrees in five years or less, and four out of ten (38-46%) earned their degrees in four years or less.
- Only 4-8% of students who earned bachelor's degrees between 2004-05 and 2008-09 took longer than 10 years to earn their degrees.
- A higher proportion of students who entered the university as full-time students completed their bachelor's degrees within six years (85-88%) than did students who entered CCSU as part-time students (61-75%). About 10-16% of graduates who entered as part-time students took ten years or more to earn their degrees, while only about 2-5% of those who entered as full-time students took ten years or more to earn their degrees.

## Credits Earned Upon Graduation

- Over half (51-55%) of the students who earned bachelor's degrees between 2004-05 and 2008-09 completed their degrees with 120-129 credits (minimum credit requirements since at least 1995 have been 122 for non-teaching degrees and 130 for teaching degrees). Almost another quarter (22-23%) completed their bachelor's degree with 130-139 credits. Only about one out of twenty graduates (3-5%) completed a bachelor's degree having earned 170 credits or more.
- About 1-8% fewer graduates who entered CCSU as part-time students completed their degrees having earned fewer than 130 credits. Conversely, about this same proportion of graduates who entered CCSU as part-time students completed their degrees having earned between 130-139, 140-149 and 150-159 credits.
- No meaningful changes over time in patterns of earned credits emerged over the five-year time period covered by this study.
