

Netbook Rental Information

The Student Center has Netbooks to borrow for student use!

A netbook acts like a laptop, but does not have a hard drive where applications are stored locally. These do have a web cam so you can Skype or video chat. They are much lighter and compact than a normal laptop, but just as fast!

- Netbooks are **free** to current CCSU Students with a Bluechip ID
- Netbooks can be borrowed with the Reception Desk Attendant 8 AM – 5 PM Rm 1160000
- Netbooks can also be borrowed from the Info Desk after 5 PM and on weekends.
- You can borrow a netbook until the battery runs out, or until the next day the Student Center is open (overnight)
- The battery lasts 6 to 8 hours depending on use. (Video viewing uses battery more quickly)
- Detailed instructions for use are on the desktop when you start the netbook
- The netbooks operate similar to the kiosks in the student center except you can use the Citrix service to access Microsoft office programs and more!
- To save your work, use your personal M: drive or a USB flash drive
- Netbooks can be checked out consecutively provided there is not a waiting list to use one
- You can use the netbooks at any location there is wireless internet including your home
- If you do not return the device within one week of the date checked out, your student account will be charged \$500 for the replacement fee

This service is provided by **Information Technology** and **Student Center Operations**
