Due to the variety of vehicles to be serviced under the resulting contract, and the fact that it is impossible to offer one flat fee for most services, CCSU has decided to amend the Pricing Sheet for this RFQ and to revise the related Service Specifications.

Attached is a revised Pricing Sheet for this RFQ. Please complete and return the revised sheet with your bid response.

All other terms, conditions and specifications in the RFQ remain the same.

SERVICE SPECIFICATIONS (REVISED):

Lubrication Service:

**Chassis Lubrication:** Oil change including filter—shall include up to five (5) quarts (up to eight (8) for trucks) of motor oil (grade recommended by the vehicle manufacturer). Check and fill all fluid levels.
1. Oil and filter change
2. Lubrication of chassis, hinges, and outside locks.
3. Check Operation of all lights.
4. Inspect and adjust tire pressure, check tires for abnormal wear.
5. Top off all fluids.
6. Inspect all hoses, belts and filters.
7. Inspect wiper blades for deterioration and wear.
8. Visual inspection of master cylinder, fittings, calipers, pads, shoes, wheel cylinders and lines for damage or leakage.
9. Lubricate parking brake and associated linkage.
10. Emergency parking brake adjustment.

Tire Service:

1. Tire Rotation
2. Balancing of 4 tires.
3. Repair tires as needed.
4. Tire Mounting and Balancing

Tires to be supplied to Vendor by Agency. Vendor to dispose of used tires at no cost to Agency in accordance with all applicable local, state and federal laws governing such.

As Required:

**A. Automatic Transmission Service:**

1. Inspect automatic transmission for proper operation.
2. Drain automatic transmission fluid, remove oil pan for replacement of filter/screen and pan gasket and refilling of transmission fluid with manufacturer’s recommended automatic transmission fluid.
3. Inspect for external leaks and transmission mount condition.
4. Functional test for shift points and smoothness.
5. Repair leaks, linkage adjustment, including complete rebuilding, if required.
6. Road Test

**B. Engine Performance and Emissions Service:**

1. Replace spark plugs, examination of ignition coil, wires and cap, replace air filter.
2. Diagnostic test to pinpoint electrical and other engine problems.
3. Adjust basic ignition timing and curb idle speed as necessary.
4. Inspect condition of battery cables and connection. Tighten battery terminals and inspect belts and hoses for condition and wear.
5. Replace air and emission filters.
6. Inspect evaporative emission recovery system function.
7. Examine all vacuum lines for condition, leakage, and proper connection.
8. Check for proper operation of EGR, deceleration and idle control valves as applicable.
9. Examine operation of thermostatically controlled warm valve.
10. Verify operation of distributor advance system.
11. Road test.

C. **Fuel Injection and Cooling Systems Service:**

1. Clean fuel injectors.
2. Cooling System Maintenance:
   3. Test for coolant protection
   4. Pressure test cooling system.
   5. Visually inspect all radiator and heater hoses, freeze plugs, expansion tanks and cap for condition and leakage.

D. **Brake and Front End Alignments:**

1. Brake services to include relining or replacement of brake shoes, resurfacing of rotors and drums, inspection of brake cylinders and hardware, filling of master cylinder with SAE recommended brake fluid.

2. All front end and rear end work, including, but not limited to, front end alignments, differentials, CV joints, ball joints, shocks, struts, spring, and all standard services included therein.

E. **Exhaust System, including but not limited to:**

1. Pipes
2. Muffler
3. Clamps
4. Flanges
5. Catalytic Converters
