Contents of Addendum 1:

Answer questions submitted related to the project

1) Can the stage support a small scissor lift for the demolition?
   Answer: The stage can support a small scissor lift. The University strongly recommends that the lift be placed on 3/4 inch plywood for additional support.

2) If any of the rigging components are welded to the building structure, are they to be removed as well?
   Answer: Welded components are to remain

All other terms, conditions and specifications in the RFQ remain the same.
