Faculty Development Opportunities for Teaching HyFlex in Spring 2021

Are you teaching a HyFlex course in Spring 2021? Are you interested in learning Hyflex technology available in classrooms such as Kaltura, Blackboard Collaborate, Microsoft Teams, or WebEx? Are you teaching on a Micro Cart next semester and would like some hands-on experience? Would you like a Blackboard course template pre-built for you so all you need to do is add your content or would you like to brush-up on other instructional technology skills?

The IDTRC and CTFD have you covered! We are offering numerous opportunities between November and January online or on-campus to gain technology skills in preparation for the spring semester. We are limiting the number of people in each session, and available instruction slots will fill up fast, so reserve your spot soon.

Please note that each training is specific to one topic. We will be covering ONLY the subject listed in each session. If you are curious about other topics, please sign up for more than one session. It is also important that you come to your session with a basic understanding of the different platforms and how they operate. The IDTRC has curated numerous manuals, catalogs, and short instructional videos that explain the various modalities. Please come to your session prepared.

You can find them here:

- [Center for Teaching and Faculty Development HyFlex Resources](#)
- [Instructional Design and Teaching Resource Center Service Catalog](#)
- **HyFlex with Kaltura**
  Kaltura Classroom allows synchronous teaching and learning for on-ground and online students. Learn to navigate the platform with a trained staff member.

  [Schedule a Session](#)

- **HyFlex with Web Conferencing**
  In addition to Kaltura, the University offers various web conferencing platforms that work in the HyFlex classrooms. Learn what Blackboard Collaborate, Microsoft Teams, and WebEx can offer you and your students and which platform is best for you.

  [Schedule a Session](#)

- **HyFlex Micro Cart**
  Are you assigned a Micro Cart for Spring? Join a trained staff member to help you learn the ins and outs of the carts and how they can best meet your instructional technology needs.

Guided Practice with HyFlex Teaching: Individual Practice Sessions with Staff Member

Sign up for an individual session to develop and fine tune your classroom technology skills. Guided practice allows you to experiment with the different platforms used in the Hyflex classrooms with a trained staff member available for questions and guidance.

*Important note: This practice will assume you are familiar with the basics of HyFlex through prior teaching or completion of one of the above workshops. This should not be your introduction to HyFlex technology.*

Schedule a Session

Experiencing the HyFlex Broadcast: In addition to these in-person workshops, we will have several opportunities for you to experience a HyFlex class in the role of student. You can join specified workshops from your own computer to experience a synchronous, online class through the eyes of a student. Registration is required for these sessions to provide the log-in instructions.

If you have any questions about the sessions, please feel free to email IDTRCStaff@ccsu.edu and/or CTFD@ccsu.edu

Using the Blackboard Pre-built Templates: The ITDRC has developed several pre-built Blackboard templates for your use. The IDTRC has built these templates taking into account Quality Matters’ principles and CCSU commonly used Tools and packaged them for you in useful course packages. Learn how to locate, view and import these templates into your Blackboard course shell.

Register for a Session

Blackboard Basics and More: There are many opportunities to brush-up or learn the Blackboard basics, configure final grades, learn the fundamentals of the Grade Center or develop assessments and quizzes.
