

### Using AirMedia on an iPhone or iPad in a CCSU Classroom

AirMedia allows users to wirelessly present laptop, tablet, or smartphone screens on the projector screens in the classroom. There are no wires to hook up and no complicated settings to configure. Just install the AirMedia app on your device, startup AirMedia on the Crestron station in the classroom, put in an URL address and code and you are ready to go.

Prior to using AirMedia in the classroom, you will need to install the Crestron AirMedia app. Go to the App Store and search for Crestron AirMedia (not AirMedia for AM-100).

After installation, follow the instructions below:

1. Touch the Crestron screen in the classroom and choose AirMedia.

2. The screen will show the Crestron logo and the URL to use for presenting at the bottom of the screen. It will also show a code.

## iPhone and iPad Instructions

3. Open the Crestron AirMedia app, agree to the terms and conditions, type in the numbers from the URL on the Crestron screen. For example: 10.25.171.56. Click Go.

4. A box will appear with instructions. Swipe from either the upper right corner or bottom of your screen to access the control center. Choose Screen Mirroring.

5. Tap the option that matches the AirMedia URL that you entered.

6. You will then be prompted to enter the 4-digit code that shows on the Creston screen. Click OK.

**Note:** The 4-digit code will change after each use of AirMedia.

7. A check mark will appear next to the option once it is connected. Return to AirMedia app.

8. Click OK in the Connect Using AirPlay box.

9. The screen from your iPhone or iPad will appear on the projector screen. You are ready to present.
10. To end the presentation, go to Screen Mirroring and choose Stop Mirroring. If you do not Disconnect, AirMedia will still be running and connected, even if you leave the room.

11. Close the Crestron AirMedia app on your device. If you are done using the projector, choose **Exit System/Yes Shutdown** on Crestron Panel.
