OneDrive is Here!

IT is in the process of implementing Microsoft OneDrive as a replacement for M drives. Faculty/Staff m: drives are being migrated December 30-January 10. You will receive an email from the “CCSU OneDrive Migration Team” indicating when your m: drive is scheduled to be moved. Once complete, your files will have these statuses in File Explorer:

1. A blue cloud icon next to a OneDrive file or folder indicates that the file is only available online. Online-only files don’t take up space on your computer. You see a cloud icon for each online-only file in File Explorer, but the file doesn’t download to your device until you open it. You can’t open online-only files when your device isn’t connected to the Internet.

2. When you open an online-only file, it downloads to your device and becomes a locally available file. You can open a locally available file anytime, even without Internet access. If you need more space, you can change the file back to online only. Just right-click the file and select “Free up space.”

   With Storage Sense turned on, these files will become online-only files after the time period you’ve selected.

3. Only files that you mark as “Always keep on this device” have the green circle with the white check mark. These always available files download to your device and take up space, but they’re always there for you even when you’re offline.

- Information Technology will be holding informational sessions throughout the semester to help transition in the PC Classroom, Student Technology Center in Marcus White Annex.
  - Wednesday, December 18 from 11am-12pm

Windows 7 & Internet Explorer 11 Support Ending January

If you have any remaining Windows 7 computers in your office and labs, please contact the IT Help Desk for upgrade options. For example, if you have a computer connected to an instrument that must remain on Windows 7, please contact the IT Help Desk so that this exception can be documented and appropriate security measures can be taken.

Additionally IE11 will be uninstalled from computers on campus before the start of the spring 2020 semester. This was discussed in September at the ITC meeting.

Security Awareness Training

This year, Security Awareness Training is being coordinated through the Board of Regents System Office. If you are required to take this training, you should have received an email from CSCU-SecAwarenessTraining@ct.edu. Primarily, those with access to the Secure Enclave are required to take this training by 12/31/19.
