Gaming devices (Xbox, PlayStation, etc.), streaming devices (SmartTV, AppleTV, Amazon FireStick or FireTV, Roku, etc.) and wired computers (Windows or Mac) must be registered in the CCSU My Devices Portal in order to connect to the ccsu-public wireless network or wired network. To register a device:

1. Using a computer or phone/tablet connected to the internet already, open your web browser and navigate to https://mydevices.ccsu.edu.

2. Enter your BlueNet username and password, and then click on Sign On.

3. At the Manage Devices screen, click on the Add button.

4. Complete the Add Device screen:
   
a. **Device Name**: enter a descriptive name for the device that includes your name and the type of device. For example, “Jane Doe Xbox”, “John Smith FireStick”, or “Mark Rivera PC” (do not include punctuation such as a period or apostrophe).

b. **Mac Address**: For gaming/streaming devices, enter the wireless MAC or wi-fi address of your device. For computers, enter the physical/wired MAC address. This is typically found under the network information section of your device.

c. **Description**: this is an optional field that can be used if you would like to further describe your device.

5. Click on the Submit button. Repeat steps 4 and 5 for each device you wish to register, up to 12.

6. **Gaming/Streaming devices** – Connect your devices to the ccsu-public wireless network. You may need to power-cycle the device if you are not getting an active connection. Registered gaming devices are only permitted to connect to ccsu-public while in CCSU residence halls, or in designated gaming/lounge areas. Please use ccsu-bluenet for non-gaming devices across campus.

**Computers (Windows or Mac)** – plug your computer in to the wired network. You may need to power-cycle the device if you are not getting an active connection. (Note, for wireless access on a computer, connect to the ccsu-bluenet wireless network, sign in with your BlueNet username and password and accept/trust the certificate).
