

Gaming, Streaming, Wired Computer Registration in Residence Halls

Gaming devices (Xbox, PlayStation, etc.), **streaming devices** (SmartTV, AppleTV, Amazon FireStick or FireTV, Roku, etc.) and **wired computers** (Windows or Mac) must be registered in the CCSU My Devices Portal to connect to the **ccsu-public** wireless network or wired network. To register a device:

1. Using a computer or phone/tablet connected to the internet already, open your web browser and navigate to <https://mydevices.ccsu.edu>.
2. Enter your **CCSU Office 365 email address (@my.ccsu.edu)** and **password**.
3. At the Manage Devices screen, click on the **Add** button.

4. Complete the Add Device screen:
 - a. **Device Name:** enter a descriptive name for the device that includes your name and the type of device. For example, "Jane Doe Xbox", "John Smith FireStick", or "Mark Rivera PC" (*Note: do not include punctuation such as a periods or apostrophes*).
 - b. **Mac Address:** For **gaming/streaming devices**, enter the **wireless MAC or wi-fi address** of your device. For **computers**, enter the **physical/wired MAC address**. This is typically found under the network information section of your device.
 - c. **Description:** this is an optional field that can be used if you would like to further describe your device.

5. Click on the **Submit** button. Repeat steps 4 and 5 for each device you wish to register, up to 12.
6. **Gaming/Streaming devices** – Connect your devices to the **ccsu-public** wireless network. You may need to power-cycle the device if you are not getting an active connection. Registered gaming devices are only permitted to connect to ccsu-public while in CCSU residence halls, or in designated gaming/lounge areas. Please use ccsu-blunet for non-gaming devices across campus.
Computers (Windows or Mac) – plug your computer in to the wired network. You may need to power-cycle the device if you are not getting an active connection. (Note, for wireless access on a computer, connect to the ccsu-blunet wireless network, sign in with your BlueNet username and password and accept/trust the certificate).
