

# Self-Service Device Registration for Gaming and Streaming Devices

## Instructions

You may connect most modern gaming devices (Xbox, PlayStation, etc.) and streaming devices (SmartTV, AppleTV, Amazon FireStick or FireTV, Roku, etc.) to the CCSU-gaming wireless network in residence halls. To do so, you will first need to register the devices using the CCSU My Devices Portal.

To register a device:

1. Using a computer or phone/tablet connected to the internet, open your web browser and navigate to <https://mydevices.ccsu.edu>.

2. Enter your BlueNet username and password, and then click on Sign On.

3. At the Post Access screen, click on the Continue button.

4. At the Manage Devices screen, click on the Add button.

5. Complete the Add Device screen:

- a. **Device Name:** enter a descriptive name for the device that includes your name and the type of device. For example, "Jane Doe's Xbox" or "John Smith's FireStick".
- b. **Wifi Mac Address:** enter the wireless MAC or wi-fi address of your device. This is typically found under the network information section of your device.
- c. **Description:** this is an optional field that can be used if you would like to further describe your device.

6. Click on the Submit button.

7. Connect your device to the **ccsu-gaming** wireless network. You may need to power-cycle the device if you are not getting an active connection.

Follow this process for each device you would like to register, up to 12 devices.
