What are you awesome at:

Elaboration, Communication, and Patience. Learning things in simple term and connecting them to different examples in the real world will help you understand the material better. I am here to make you feel confident about the material after we meet, and truly help you to understand what you need help on no matter how long it takes!

Personal Statement:

It is okay to ask for clarification on things you truly do not understand as well as asking for things in simpler terms!

What are you awesome at:

Explaining things in a way that makes sense! I use analogies for almost everything, and I try to use practical applications or explanations to help make concepts easier to understand and retain! I would consider writing to be my strong suit, both in terms of struct APA formatted research papers and more general essays. I will work with you to help improve the flow, fluency, and organization of your papers, as well as making sure all required content is included. I know how to code using R for statistical analysis, so feel free to come to me with any questions pertaining to it! I also know how to navigate SPSS, as well as the Qualtrics program used to create study questionnaires online.

Personal Statement:

I will always try my best to meet you where you are, and to aid in making things easier to understand. I will aim to familiarize myself with the content you need help in before the appointment so that I can provide support in the most efficient way possible. Tutoring is a two-way street, as I feel that I can learn just as much from you as you can from me. Learning should be fun and intellectually stimulating, so let us help when things seem stressful!

**What are you
awesome at:**

I am awesome at encouraging others to see their strengths and motivating them to do the best they can. I love reading research articles and can help others find the best resources for papers, literature reviews, and/or research proposals. I am a great listener and can help guide others to add value and meaningfulness into anything they want to accomplish.

**Personal
Statement:**

I know what it is like to feel frustrated when you are unable to grasp a certain concept or feel defeated when you have tried every possible way to tackle your assignments or exams, only to be stumped. I am here to build confidence in how you study and learn, together we can find ways to overcome obstacles and use our curiosity and willingness to tackle all of the questions we have.
