Hey, I wanted to see if you know anyone who might be available for a full-time (40 hrs/week) Test Technician role in Wallingford. The person can still be in school as long as they're able to commit to the hours.

Details:

- Pay: \$24/hr (contract-to-hire)
- Shift: Monday–Friday, 6 AM–2 PM
- Location: Wallingford, CT
- Benefits: Optional during contract; 95% company-paid once permanent

The role involves testing PCBs, troubleshooting to the component level, and working with tools like multimeters and oscilloscopes. RF or fiber optic experience is a plus but not required. The environment is clean, structured, and focused on high-quality R&D work for government and commercial clients.

We've had great success filling these roles with CCSU & NVCC grads in the past, and it's a solid opportunity for someone early in their electronics career to grow in a hands-on, technical setting. Let me know if someone comes to mind!

DETAILS:

- Duration: Contract to Hire
- Location: Wallingford, CT
- Salary: \$24/hr
- Benefits: Optional Cafeteria style benefits for contractors; Radiall pays 95% of benefits once permanent.
- Shift: 6:00 AM to 2:00 PM, Monday to Friday

We are currently seeking a **Test Technician** in **Wallingford, CT**.

As a **Test Technician**, your day-to-day duties will consist of and may not be limited to:

Responsibilities:

- Set up and operate test equipment to perform functional, in-circuit, and environmental tests on PCBs and electronic assemblies.
- Interpret and follow test procedures, schematics, and technical documentation to ensure accurate and efficient testing.
- Diagnose and troubleshoot failures to the component level using test results, oscilloscopes, multimeters, and other diagnostic tools.
- Document and maintain detailed test records, failure reports, and corrective actions.
- Assist in developing and improving test processes to enhance efficiency and quality.
- Collaborate with the engineering team to resolve technical issues and optimize testing procedures.
- Ensure compliance with company standards, ISO requirements, and safety protocols.

Essential Skills:

- 2+ years of experience in PCB testing, diagnostics, and troubleshooting.
- Associate's degree or equivalent certification in Electronics, Electrical Engineering, or a related field.
- Proficiency in using test sets, oscilloscopes, multimeters, and other related tools.
- Strong understanding of electronic components, schematics, and PCB layouts.
- Ability to work independently and maintain high attention to detail.

Additional Skills & Qualifications:

- Experience with RF and/or fiber optic testing is a plus.
- Familiarity with IPC-A-610 or J-STD-001 standards.
- Knowledge of Lean Manufacturing and Continuous Improvement methodologies.
- Basic measurement skills using both standard and metric systems.
- Ability to reason, analyze, and problem-solve effectively.

Why Work Here?

Our company engages in a lot of Research & Development for military projects, which can be intriguing for those who are curious and eager to learn.

Work Environment:

The work environment is clean and organized, focused on high-quality production for both government and private clients. Safety protocols and quality standards are strictly maintained.

Company Overview

Founded in 2010, Top Prospect Group was created with a focus on matching high-quality candidates with top clients while fostering an environment where success is shared by all. In 2023, the company was acquired by HW Staffing Solutions, expanding its service offerings to include technology and professional services. Both organizations are committed to treating people with dignity, providing excellent service, and connecting great people with great companies.

Qualified candidates are encouraged to apply immediately!

Please include a clean copy of your resume, salary expectations, and any references in your application.

Kind Regards,

Daniel Dubay
