

Commonly Used Research Journals and Their Abbreviations

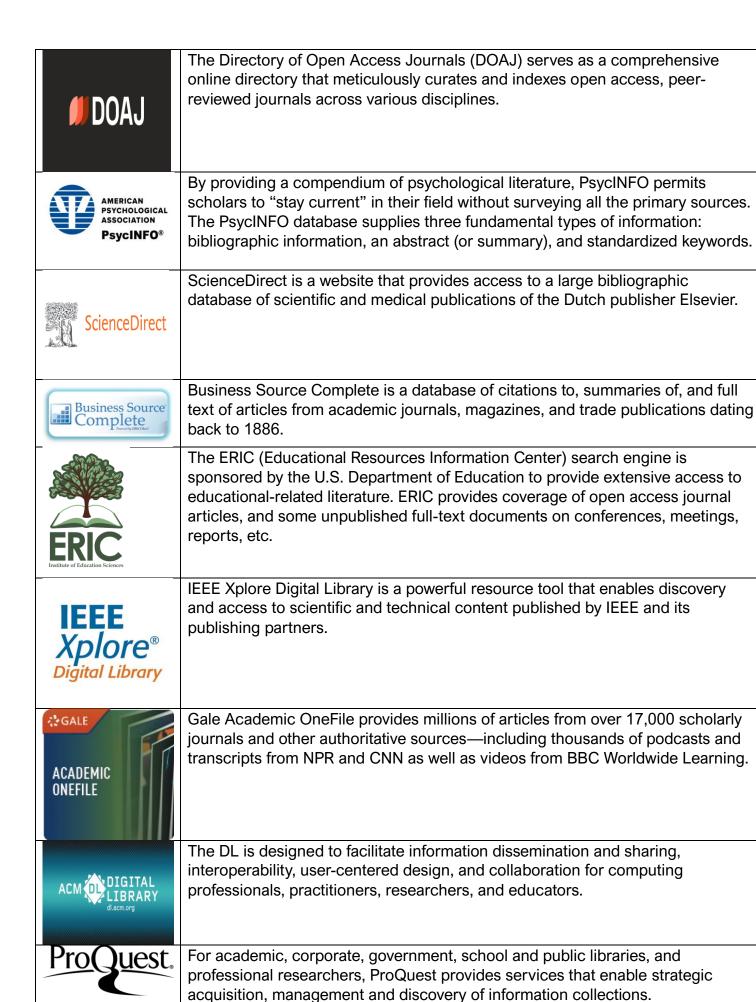

Websites that can help your research skills! Let the CCSU writing owl help you!

STOR	JSTOR" stands for "Journal Storage" and is a protected electronic archive of leading journals across many academic disciplines. It provides text-searchable, high-quality .pdf facsimiles of each journal article from a publication's inception up to the past 3-5 years.
Pub Med.gov	The PubMed database contains more than 37 million citations and abstracts of biomedical literature. It does not include full text journal articles; however, links to the full text are often present when available from other sources, such as the publisher's website or PubMed Central (PMC).
EBSCO host	Designed for academic institutions, this database is a leading resource for scholarly research. It supports high-level research in the key areas of academic study by providing journals, periodicals, reports, books and more.
WEB OF SCIENCE	Web of Science is an online index that covers journal articles published in the physical and life sciences, health sciences, social sciences, arts and humanities. Web of Science is a great database to use for public health research or other topics that may be of interest to various disciplines.
Scopus	Scopus uses four broad subject areas: Physical Sciences, Health Sciences, Social Sciences, and Life Sciences. Scopus allows users to: Search for articles, conference proceedings, trade publications, and book chapters on a topic. Find author information, such as H-index, and lists of publications.

WorldCat is an online library catalog that lets you look up books, dissertations, microform, journals and multimedia items in libraries around the world.
