

### Three-year Official Cohort Default Rates for Schools

On October 28, 2009, the U.S. Department of Education published in the Federal Register the regulations enacted by the Higher Education Opportunity Act of 2009 that will govern the calculation of cohort default rates. Under the new provisions, an institution's cohort default rate is calculated as the percentage of borrowers in the cohort who default before the end of the second fiscal year following the fiscal year in which the borrowers entered repayment. This extends the length of time in which a student can default from two to three years.

A 3-year cohort default rate is the percentage of a school's borrowers who enter repayment on certain Federal Family Education Loan (FFEL) Program or William D. Ford Federal Direct Loan (Direct Loan) Program loans during a particular federal fiscal year (FY), October 1 to September 30, and default or meet other specified conditions prior to the end of the second following fiscal year.

The U.S Department of Education releases official cohort default rates once per year. The FY 2019 official 3-year cohort default rates were delivered to schools in October (2022).

2019	2.1	61	2787	13,866	20.10%
2018	5.7	162	2820	14,006	20.13%
2017	6.5	179	2750	13,930	19.74%

**ENROLLMENT NOTE:** To provide context for the Cohort Default Rate (CDR) data, we include Enrollment Figures (students enrolled at any time during the year) and the corresponding Percentage Calculation (borrowers entering repayment divided by that enrollment figure). There is no direct relationship between the timing of when a borrower entered repayment and any particular enrollment year; we have chosen to use the academic year ending on the 30th of June before the beginning of the cohort year.

Cohort Default Rate (CDR) data is not displayed when Number of Borrowers in Repayment (number of borrowers entering repayment in cohort) includes 10 or few borrowers.
